

Certified Pediatric Nurses Work Here

Certified Pediatric Nurses (CPNs) go above and beyond being licensed by their state.

These nurses have passed a rigorous national exam given by the Pediatric Nursing Certification Board. They have achieved recognition in their specialty of pediatric nursing because they

- Have demonstrated mastery of pediatric healthcare knowledge.
- Are committed to continued professional growth through an annual recertification process.

CPNs reassure family members and the community that they are dedicated to staying current on all aspects of child health and well-being.

This facility takes pride in its staff and displays this document as testimony to the value and respect specialty certification commands.

Validation of expert knowledge and experience should be celebrated. We hope you join with us in applauding the accomplishments of the nurses who have attained this respected recognition.
